Osama Soliman

Software Engineer

Summary

Over 6 years' experience in Software Development, I am a hard
worker, fast learner,
and self-motivated developer, I work well with teammates and enjoy
getting the work
completed in time and love handling new challenges.

Highlights:
● Impacting ~190,000 developers around the world on Stack
Overflow.
● Created a Google for drugs app (Dawaey) that was downloaded
~100,000 times and
used over 4,500,000 times by healthcare providers till now.
● Contributed to developing a Facebook for nurseries app @Parent
ApS.
● Contributed to Open-source within many projects (~55 code Repos
on Github).

I have over 3 years' experience working Remotely through platforms
like
Upwork/Hub staff, I am used to having a daily team meeting,
discussing daily
progress, also I am available for Travels when Needed.

Frontend/UI Skills:
HTML5 , CSS3 , SASS, JavaScript , JQuery , Angular, Ionic(1, 2,3),
AngularJS, Angular, Cordova,
Typescript, Bootstrap, Angular Material, Adobe Photoshop CC 2017,
React, React Native,
NativeScript.

Backend Skills:
MEAN STACK- Express, MongoDB, NodeJS, Gulp, XML, JSON,
Socket.io, PostMan

Other Skills:

Git, GitHub, BitBucket, Jira, Slack, Trello, Zoom

Find me on:
✓ Facebook – Developer communities active contributor. @microsmsmx
✓ Stack Overflow – Top 10% overall for 3 years in a row. @microsmsm
✓ LinkedIn – Professional connections, blogs, and more skills overview. @microsmsm
✓ Twitter – World-wide new tech follower. @microsmsm
✓ Github – Open source contributor with over 60 projects. @microsmsm

Knox Fintech - ExKnox.com
Crypto Frontend Developer
September 2017 - November 2017 (3 months)

Lead developing UI/UX for Blockchain, Crypto Currency and Decentralized Apps

At Exknox I was responsible for the clientside works, from HTML to CSS to JavaScript, some Angular and little API developing. it was a fun experience to help little Startup in the USA in crypto-exchange and cryptocurrencies to evolve, what was cooler that one of my employers was just 18 years old but decent ruby and crypto experience, all respect!

Thanks, Exknox for the chance to develop for crypto...

Parent ApS
Mobile Software Developer
April 2017 - June 2017 (3 months)
Værløse, Copenhagen, Denmark

Remote cross-platform mobile application developer, I was responsible for developing application that takes care of children in pre-school and nurseries. Developing high quality cross platform apps.

Optimizing performance, fixing bugs and implementing cool features.

I used JavaScript, TypeScript, Ionic, Angular and some other cool bleeding-edge technologies to build the app.

It was huge with over 50 screens to manage the whole system with multi-user dashboard, check-in system, paper-less routines, child friends, social newsfeed, child progress, and graphs and other advanced programming stuff was there.

I enjoyed the experience and the professionalism was in it.

Thanks, Parent, Thanks Kareem, Thanks Firas and all the Awesome Team.
